The paper by Liu *et al.* [(2015), *Acta Cryst.* **F71**, 1063–1066] is corrected.

In the paper by Liu *et al.* (2015), the name of the precipitant used in the crystallization of the RsmA protein was given incorrectly as lithium chloride. This error occurs in §§2.2 and 2.3, Table 2 and the caption for Fig. 2. The correct name of the precipitant is lithium sulfate.
