Received 29 November 2015; accepted 30 November 2015

In the paper by Yennawar & Silverberg [*Acta Cryst.* (2014), **E70**, o133], the conformation of the thiazine ring was reported incorrectly.

The authors of Yennawar & Silverberg (2014) have indicated that the conformation of the thiazine ring in the title compound should be an envelope, with the S atom forming the flap, and not half-chair as originally given.
