

puter programs. Any erratum found either in the reference or in an abstracting journal (e.g. *Structure Reports*) is specifically mentioned: erroneous values are thus identified. Editorial critical remarks point out possible errors in the literature.

Formula and name indexes enable one to learn if crystallographic information is available on any given compound, thereby providing a starting point for bibliographic searches.

Amorphous magnetism. Proceedings of the International Symposium on Amorphous Magnetism, Aug. 17-18 1972, Detroit, Michigan, U.S.A. Edited by H. O. HOOPER and A. M. DE GRAAF. Pp. xiii + 443, Figs. 126, Tables 21. New York: Plenum Press, 1973, Price \$30.50.

Contents

- Topics in Spin Glasses – P. W. Anderson.
- It's a Random World – J. A. Krumhansl.
- Amorphous Antiferromagnetism in Some Transition-Element-Phosphorus Pentoxide glasses – T. Egami, O. A. Sacli, A. W. Simpson, A. L. Terry & F. A. Wedgwood.
- Magnetic order in Alkaliborate and Aluminosilicate Glasses Containing Large Concentrations of Iron-Group Ions – H. O. Hooper, G. B. Beard, R. M. Catchings, R. R. Bukrey, M. Forrest, P. F. Kenealy, R. W. Kline, T. J. Moran Jr, J. G. O'Keefe, R. L. Thomas, & R. A. Verhelst.
- Antiferromagnetism in the Vanadium, Manganese and Iron Phosphate Glass Systems – L. K. Wilson, E. J. Friebele & D. L. Kinser.
- Magnetic Inhomogeneities in BaO-B₂O₃-Fe₂O₃ Oxide Glasses – R. K. MacCrone.
- Magnetic Properties of an Iron-Rich Glass – G. R. Mather Jr.
- Electron Spin Resonance Studies of Ferrimagnetic Phases Precipitated in Simulated Lunar Glasses Heat Treated in the Presence of Oxygen – D. L. Griscom & C. L. Marquardt.
- Novel Amorphous Magnetic Materials: Magnetic and Mössbauer Studies on Iron Dispersion in Zeolites – L. N. Mulay & D. W. Collins.
- Novel Dispersions of Iron in Amorphous Glasslike Carbons: Exploratory Magnetic Studies – Alan W. Thompson, P. L. Walker Jr & L. N. Mulay.
- Magnetic Susceptibility of Chalcogenide Glasses – J. Tauc, F. J. DiSalvo, G. E. Peterson & D. L. Wood.
- Long and Short Range Magnetic Interactions and Electric Switching in Highly Doped, 'Amorphous' Ferromagnetic Semiconductors – P. Wachter.
- Magnetic Ordering in NaCl-Lattices with Structural Disorder – G. Busch, M. Campagna, & H. C. Siegmann.
- The Low Temperature Magnetic Properties of Glassy and Crystalline Pd_{77.5}Cu_{0.6}S_{1.65} – B. G. Bagley & F. J. DiSalvo.
- Amorphous and Crystalline Selenium – A Mössbauer Effect Study – P. Boolchand.
- Disorder and Strong Correlations in Narrow Energy Bands – F. Brouers, P. Lederer & M. Héritier.
- Occurrence of Local Magnetic Moments in Disordered Materials – M. Cyrot.
- Onset of Magnetic Ordering in Random Substitutional Alloys – B. R. Coles.
- Structural Aspects of Magnetic Interactions in Metallic Spin Glasses – D. J. Sellmyer, J. M. Franz & L. K. Thomas.
- Low Field Magnetic Susceptibility of Dilute Alloys: Are Dilute CuMn and AuMn Magnetically Ordered? – V. Cannella.
- Calculations of Superparamagnetic Clustering in Random Alloys of Magnetic Atoms in Nonmagnetic Matrices – K. J. Duff & V. Cannella.
- Law and Order in Magnetic Glasses – N. Rivier & K. Adkins.
- Spin Arrangements in Dilute Alloys – B. Window.
- Electrical Resistivity of a Spin-Glass Random Alloy: AuFe – J. A. Mydosh & P. J. Ford.
- Nuclear Resonance and Magnetic Ordering in a Random Spin System: (LaGd)Al₂ – D. E. MacLaughlin & M. Daugherty.
- Occurrence of Local Moments and Ferromagnetism in Dilute Alloys – D. J. Kim.
- Antiferromagnetic Instability in Substitutional Alloys – Scott Kirkpatrick.
- Electrical Resistivity Anomaly in Mictomagnetic Alloys – Paul A. Beck & D. J. Chakrabarti.
- Anomalous Magnetic Properties of Mictomagnetic Fe-Al Alloys – G. P. Huffman.
- Amorphous Magnetism in F.C.C. Vicalloy II – James P Cusick, G. Bambakidis & Lawrence C. Becker.
- Magnetic Properties of Amorphous Metallic Alloys – C. C. Tsuei.
- Anomalies in Amorphous Kondo Alloys – Ryusuke Hasegawa.
- Some Structural and Magnetic Properties of Amorphous Cobalt-Phosphorus Alloys – G. S. Cargill III & R. W. Cochran.
- Low Temperature Heat Capacity of Disordered Zr-Zn₂ – R. Viswanathan, L. Kammerdiner & H. L. Luo.
- Ferromagnetism of Amorphous Iron Alloys – T. Mizoguchi, K. Yamauchi & H. Miyajima.
- Semi-Classical Theory of Spin Wave Excitations in Amorphous Ferromagnets – R. G. Henderson & A. M. de Graaf.
- Magnetic Properties, Anomalous Electrical Resistivities, and Specific Heats of Ordered and Disordered NiPt and Nearby Compositions – D. J. Gillespie, C. A. Macklitt & A. I. Schindler.
- Exchange Interactions in Strongly Paramagnetic Alloys – R. Harris & M. J. Zuckermann.
- Comments on the Hubbard Model of Magnetism in Disordered Transition Metal Alloys – D. M. Esterling & R. A. Tahir-Kheli.
- Amorphous Spin Polarization in a Tb-Fe Compound – J. J. Rhyne, S. J. Pickart & H. A. Alperin.
- Neutron Scattering Observation and Theory of Spin-Waves in Disordered Magnetic Insulators – W. J. L. Buyers.
- Comments on Spin-Wave States in Substitutionally Disordered Antiferromagnets – D. C. Licciardello, E. N. Economou & C. T. Papatriantafillou.
- Amorphous Ferro- and Antiferromagnetism Within an RPA-CPA Theory – Raza A. Tahir-Kheli.
- Spin Waves in an Amorphous Heisenberg Ferromagnet – J. E. Gubernatis & P. L. Taylor.
- Density of Spin Wave States for Disordered Cubic Ferromagnets – R. M. Stubbs & C. G. Montgomery.
- Theory of Spin-Waves in a Disordered Heisenberg Ferromagnet – S. M. Bose, K. Moorjani, T. Tanaka & M. M. Sokoloski.
- Cation Disorder and Magnetic Properties of Certain Garnet Type Crystals – R. Krishnan.
