

catalogue lists electrical, instrument and liquid feedthroughs in a selection of flange styles. As one of Europe's largest manufacturers of ionization gauges, ITL offers an exceptionally wide range of glass-encapsulated and nude ionization gauges covering operational pressures from 10^{-1} to 10^{-9} Pa.

High-quality glass, quartz, sapphire and magnesium fluoride windows are available in a variety of flanges in both zero length and other formats: ITL's differentially pumped viewport offers transmission to $10+\mu\text{m}$.

The range of flexible connectors has been increased to provide KF/CF combinations in all popular sizes; these can be vacuum annealed for added flexibility. Each catalogue section includes a useful reference section describing sealing techniques and applications information.

A completely new section of the catalogue introduces ITL's Vacuum Chamber Division.

Books Received

J. Appl. Cryst. (1995). **28**, 68

The following books have been received by the Editor. Brief and generally uncritical notices are given of works of marginal crystallographic interest; occasionally, a book of fundamental interest is included under this heading because of difficulty in finding a suitable reviewer without great delay.

Handbook of crystal growth. Vol. 1: Fundamentals. a: thermodynamics and kinetics; b: transport and stability. Edited by *D. T. J. Hurle*. Pp. xiv + 1218. Elsevier: North Holland Elsevier Science Publishers, 1993. Price US \$388.50. ISBN 0-444-88908-6. A review of this book, by William R. Wilcox and Liya L. Regel, has been published in the September 1994 issue of *Acta Crystallographica Section A*, pages 652–653.

Accuracy in powder diffraction II. National Institute of Standards and Technology Special Publication 846. Edited by *E. O. Prince* and *J. K. Stalick*. Pp. vi + 234. Washington: US Department of Commerce, 1992. Price US \$14.00. US

Government Printing Office stock number 003.003.03186.1. A review of this book, by Hugo Steinfink, has been published in the September 1994 issue of *Acta Crystallographica Section A*, pages 653–654.

Out of the crystal maze. Chapters from the history of solid-state physics. Edited by *L. Hoddeson, E. Braun, J. Teichmann* and *S. Weart*. Pp. xxiii + 697. Oxford: Oxford University Press, 1992. Price £50.00. ISBN 0-19-505329-X. A review of this book, by Hugo Steinfink, has been published in the November 1994 issue of *Acta Crystallographica Section A*, pages 796–797.

Random, non-random and periodic faulting in crystals. By *M. T. Sebastian* and *P. Krishna*. Pp. xv + 383. Reading: Gordon and Breach Science Publishers, 1994. Price £85.00. ISBN 2-88124-925-6. A review of this book, by Hassel Ledbetter, has been published in the November 1994 issue of *Acta Crystallographica Section A*, page 797.
