

Easier submission and rapid publication with *publBio*

Authors using the online smart tool *publBio* to prepare and submit their articles will benefit from a shortcut to submission and a rapid review process. *publBio* tools are also available in the IUCr Word template to offer authors more choice. Further details, help and submission advice available from publbio.iucr.org

Special issues now online

Molecular parasitology – advances in biology and supporting drug discovery including a review and historical perspective by Wim Hol

Specially selected articles from ICCBM15 – a number of articles from the International Conference on the Crystallization of Biological Macromolecules held in Hamburg, Germany in September 2014

IUCr Crystallization Series

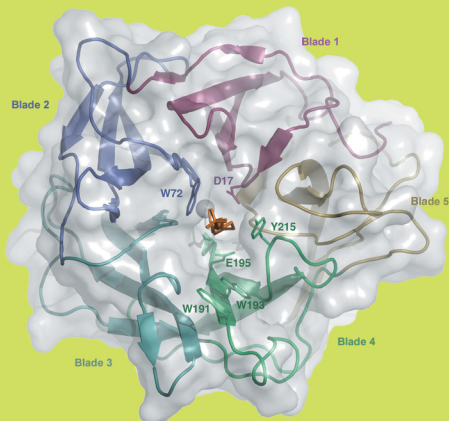

This popular series of reviews on the state of the art of macromolecular crystallization continues to

highlight scientific advances and technological developments in this important area. The complete collection will soon be available.

Aims and scope

Acta Crystallographica Section F is a rapid structural biology communications journal. Articles on any aspect of the crystallization and structure determination of biological macromolecules, including those determined using high-throughput methods or from iterative studies such as those used in the pharmaceutical industry, are welcomed.

Consider publishing via open access

Open access offers many advantages to authors including **increased visibility** and the potential for **higher citations**.

Submit your article at
journals.iucr.org/f/services/submit.html

Get **found**. Get **read**. Get **cited**.

IUCr Journals and Kudos – working together
to improve the **impact** of your published research
